

NADA

CATALOGUS 2019

A series of vertical bars in varying shades of green and yellow, some solid and some outlined, arranged in a row at the top of the page.

Living Walls

nada

Maak elke ruimte aantrekkelijk voor bezoekers en klanten door een groene moswand te plaatsen.

Het contact met de natuur, de mooie vormen en de groene kleur hebben een gunstig effect op ons humeur.

Iedereen voelt zich beter in een natuurgetrouwe omgeving.

Ook op bezoekers, werknemers, klanten of co-workers heeft een groene muur een rustgevend effect.

Onze ecologische groenwanden passen in elk interieur en zijn volledig onderhoudsvrij.

NADA 'Cause every room should be a living room.

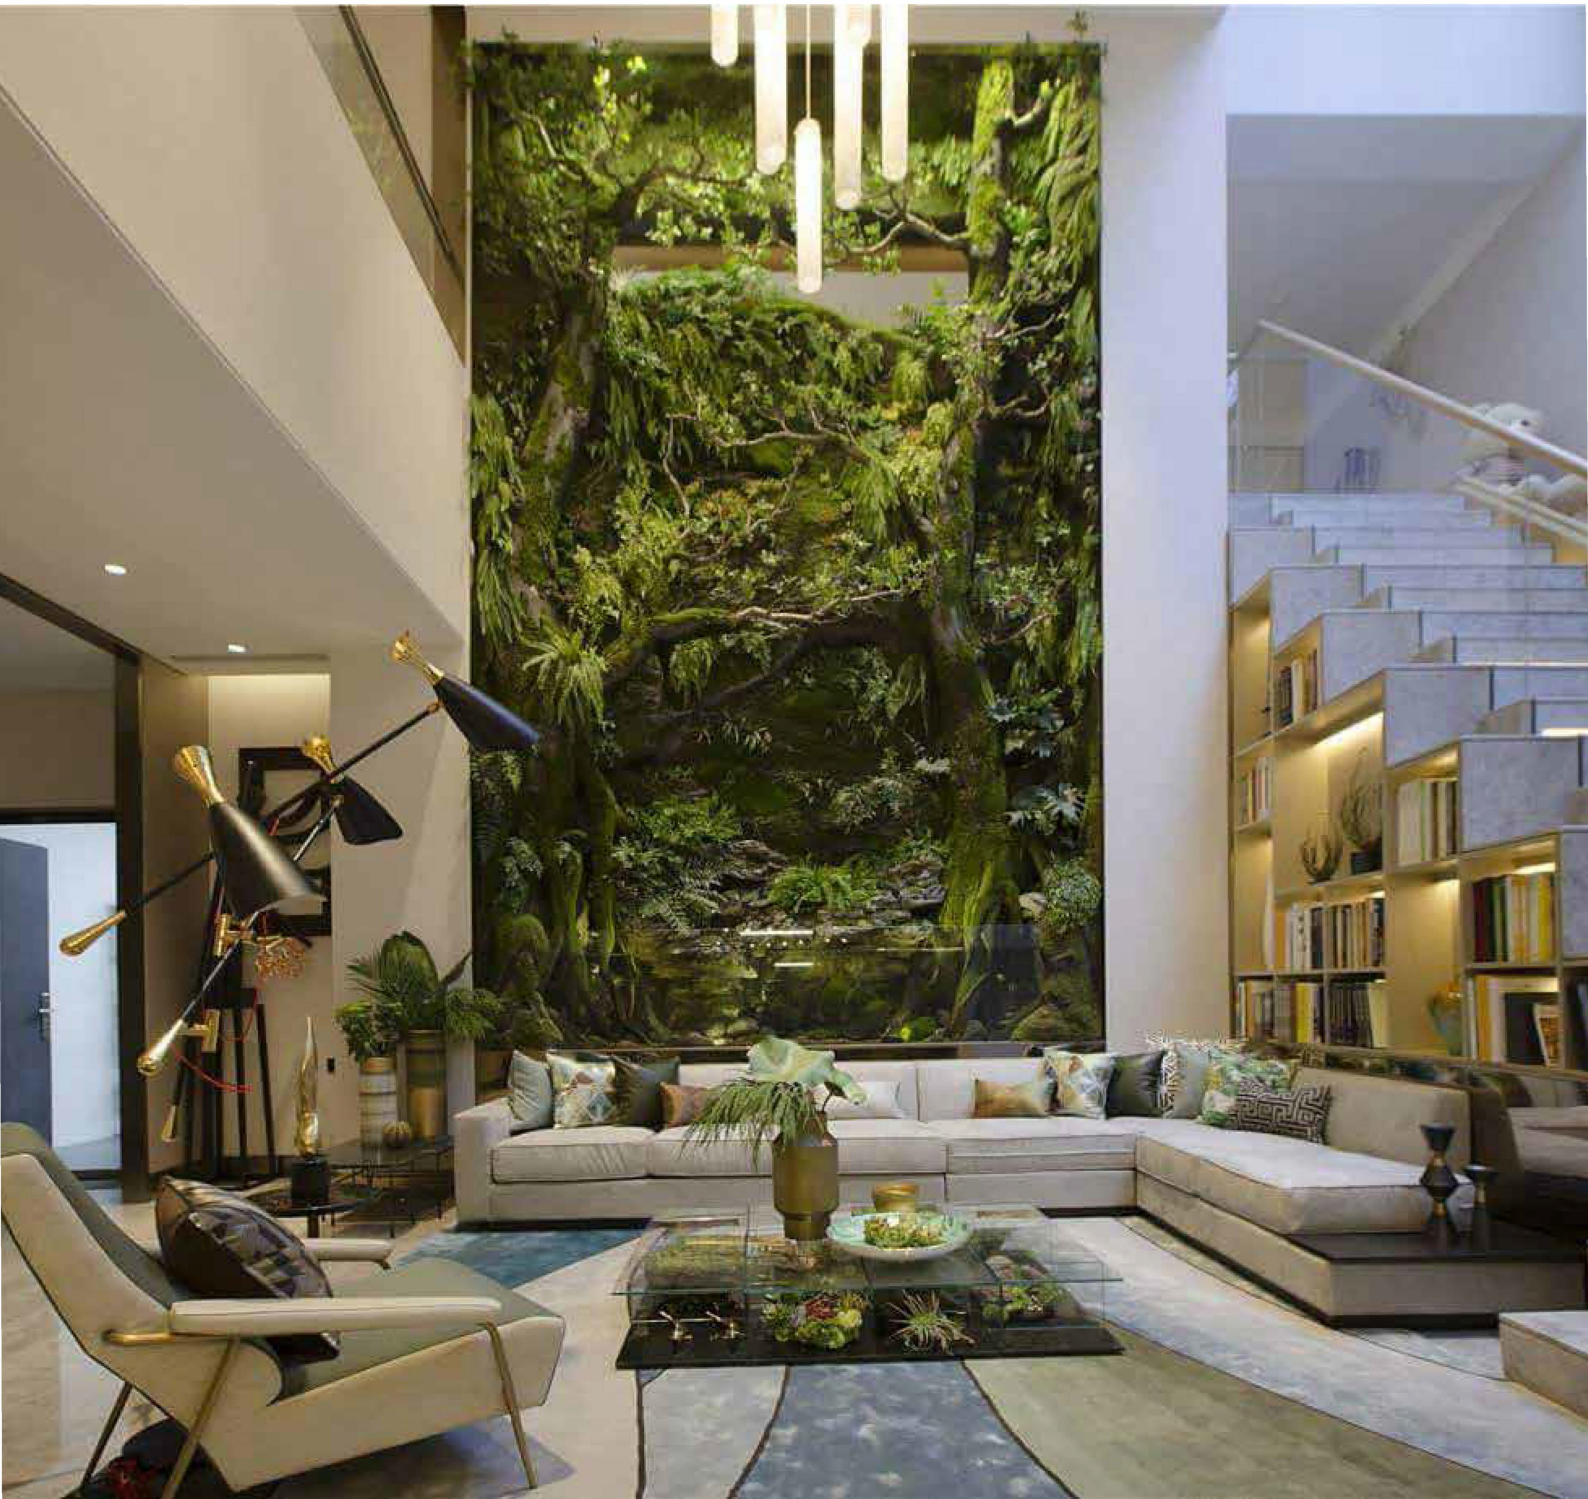

NADA NATURE

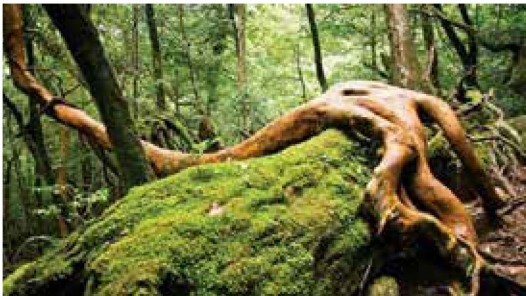

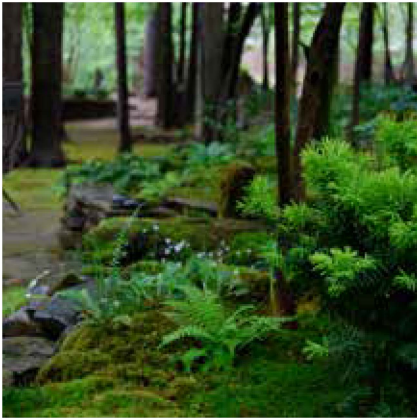

LIVING WALLS

Living Walls are the perfect eye-catcher to create a healthy, exceptional and relaxing atmosphere. Living Walls are the easiest to install, the easiest to plant and change and the easiest to maintain. Works with hydro or soil plants in their original grow pots. Also available as room divider, double- or single sided.

Epipremnum 'Golden Pothos'

Corner trays

The corner tray is the perfect solution for every design where a corner is needed for complete Living Wall coverage. Available for the PT-20-1312, PT-50-1312, PT-75-1312 and PT-100-1312 trays. The corner tray can fit 3 hydro- or soil plants.

Tray PT-20-1312

The PT-20-1312 is a flexible system for curved walls, pillars and other custom sizes Living Walls. This tray fits 1 13/12 hydro or 14 cm soil plant.

Outdoor

Living Walls can be installed for outdoor use as well. A special cover has been developed for the PT-100-1312 tray in order to keep the plant fixed in their original grow pot in the tray in case the environment recommends this.

Several irrigation methods are available, including manual, semi-automatic and fully automatic.

— Irrigation system

We offer special LED lights that have an UL approved LED driver.

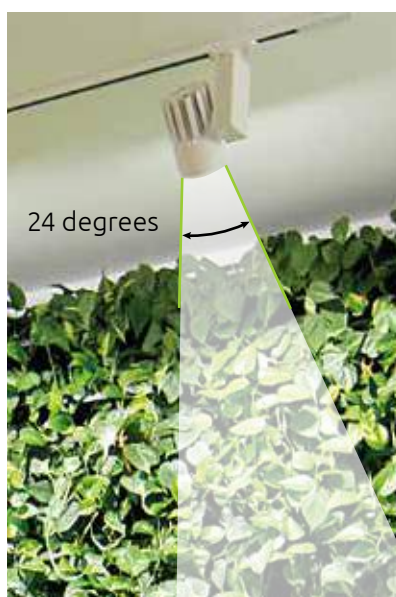

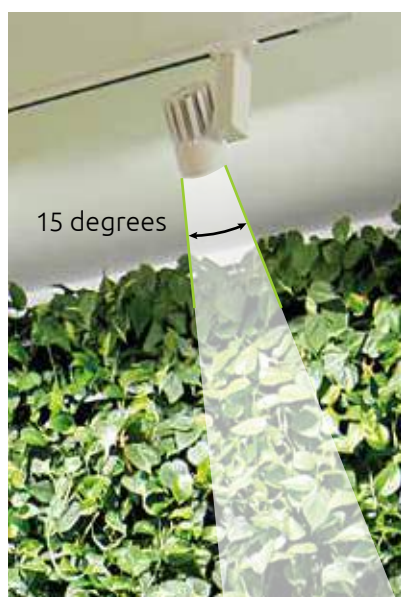

Lighting system

Optional LED lighting specifications

LED40	LED Light 40 watt
Wattage	40w
Color Temperature	5500k
Number of Wires	3 (2 conductors, 1 ground)
Phase	Single
Certifications	CE, RoHS approved, UL approved LED Driver
LED Luminous Flux (LM)	3200 Lumen
Colorrendering index (CRI)	80 RA

Distance in meters

BEAM ANGLE	RANGE	OPTIMAL
60 degrees	1.5-4.5	3
24 degrees	3-6	4,5
15 degrees	4.5-7.5	6

Special LED light is available in different beam angles to achieve sufficient light at all levels of the Living Walls.

Room divider

ONE-SIDED AND TWO-SIDED ROOM DIVIDER

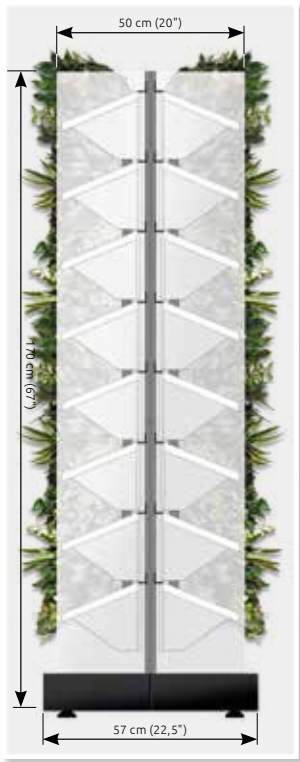

- Available in one-sided and two-sided models.
- System built of all Living Wall components.
- Suitable for both hydro- and soil plants.
- Standard 100 cm trays for 13/12 hydro or 14/14cm soil plants.
- Easy to install and easy to water.
- Massive green impact.

Item	Definition	Dimensions
NGRD-1S-10457170	Room divider one-sided	104 x 57 x 170 cm
NGRD-2S-10457170	Room divider two-sided	104 x 57 x 170 cm
SP-40160	Side panel for one-sided	40 x 160 cm
SP-50160	Side panel for two-sided	50 x 160 cm

Unit comprised of Metal Stand, 4 wheels, Base Cover, Hardware, Grids, Trays, Drain Hoses and Leaf Screens.

BIOMONTAGE

BioMontage is a unique concept to bring the nature into your living room or workplace. BioMontage is a biophilic design product that requires no light, maintenance or water. Also available as room divider, double- or single sided.

NATURAL MATERIALS

Lime green reindeer moss

Medium green reindeer moss

Forest green reindeer moss

Vivid green pole moss

Deep green long moss

BIOMONTAGE

Our reindeer moss grows abundantly in vast Scandinavian forests and is harvested by hand in a way that ensures perfect renewal of the plant. The moss is preserved naturally and is 100% biodegradable and is also fire retardant. Reindeer moss is a very efficient acoustic modulator, making it a perfect biophilic design element in public places and offices.

Our light stone panels are made from a combination of natural stone and resin, which is lighter and more manageable than raw stone. These naturally attractive panels come in two finishes which complement any interior: Prairie brown and mountain grey.

Our sustainable Yellow Poplar tree bark comes from the Appalachian Hardwood Region of the U.S. The poplar wood is used for furniture production but the bark has limited practical uses. BioMontage® helps prevent the bark from becoming waste. Our bark also has excellent acoustic properties.

Harvested sustainably by hand in the forests of France, and preserved naturally, our vivid green pole moss presents a three dimensional, natural texture in a distinctive, long lasting color.

When the Coconut tree can no longer produce its famous fruit, the tree is harvested and used in building construction and furniture production. The "Coco Bark," has very few uses and is often discarded. We hand-craft the small pieces into beautiful natural panels that fit perfectly into our BioMontage® system.

Harvested in a natural, sustainable way in the forests of Turkey and preserved naturally, Long moss is an elegant, cost-competitive alternative to flat Moss. Long moss holds its deep green color very effectively in virtually any interior environment.

The Mangium tree is used primarily in furniture production. Branches are periodically cut from the tree and could easily become waste. We slice and trim the branches into small tiles, then combine the tiles to create a stunning natural mosaic which is an exciting new addition to the BioMontage® range.

Prairie brown light stone

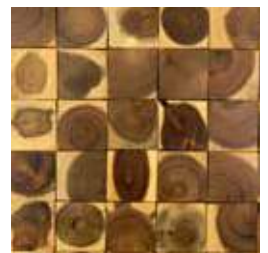

Mountain grey light stone

Sustainable Poplar bark

Upcycled Coconut tree bark

Upcycled Mangium tree branches
